Přemysl Mikulenka
IOS DEVELOPER

Profile

Motivated iOS Developer with experience in web development and Data Science. I have had a career as a FS Android/iOS developer at matsworld.io, and then as ML/NLP scientist as well as SQL developer at Valeo. I also worked as an IOS developer at Skoumal s.r.o. and Zentity a.s. where I primarily worked on large bank projects.

Diverse project experience allows me to flexibly approach new challenges and bring value to the team.

Employment History

And./iOS Developer + ML/NLP at matsworld.io

January 2020 - February 2022

I am a team worker, I like to participate in joint projects, share knowledge and also accept any advice. Involved in community meet-ups and conferences in the iOS Development industry.

SQL Developer at Valeo

September 2022 - June 2023

I optimised relational databases for various Valeo projects. Designed and implemented queries to retrieve and analyse data.

iOS Developer at Skoumal

February 2024 - July 2024

I worked on interesting projects, but they weren't much about iOS development, but they gave me a lot of experience. But I was definitely no stranger to working in a team, with nice people. We were all solving the same problems.

iOS Developer at Zentity a.s.

September 2024 - October 2025

I worked primarily on large projects in the banking sector, where we worked in an agile manner with bank developers. Large, scalable projects with a strong emphasis on thorough testing and architecture.
